About Our Paints...

MRO Industrial Enamels

A superior, lead-free industrial coating formulated for maintenance operations where maximum performance is required. This high solids paint does not run or sag, and gives twice the coverage of conventional aerosol enamels.

Big Rig

Formulated with the heavy duty owner/operator in mind, this high solids coating works best in fleet maintenance applications where maximum performance is required. Resists fading, chipping, and corrosion.

Hi Tech

A premium grad paint formulated for general purpose applications where maximum indoor/outdoor coating performance is required. Rust inhibitive.

Farm and Industry

A superior, premium grade enamel formulated for maximum exterior durability and outstanding weather resistance. Available in many popular implement manufacturer colors.

PBE

Designed for the quality conscious paint and body professional, these primers prevent rust and corrosion and enhance the quality and appearance of the finished product. Sandable in 5 minutes!

Spray Glo Fluorescent Paints

An ultra high visibility coating for any project that requires a brilliant color. It has 400% greater visibility than regular paint.

Ceiling Tile Paint

A special water based formulation for touching up stains that appear on both textured and acoustical ceiling tiles. Must be used in an upright position and is activated by pressing sprayhead to the side.

Stripe Athletic Field Marker

Specially formulated for line striping athletic fields and engineered for use in an inverted position for quick and easy application. Stripe Athletic Field Marker can be used in nearly all of our competitors marking machines due to the universal sprayhead design.

Stripe Latex Traffic Marker

An environmentally friendly water-borne formulation for line striping. Compatible with most American made marking machines currently on the market.

Stripe Temporary Marking Paint

A quick drying marker applied in an inverted position where a temporary mark is desired. Marking paint remains for only as long as the paint remains free of moisture. Paint will simply wash away after a few heavy rains or by directly removing the paint with a garden hose.

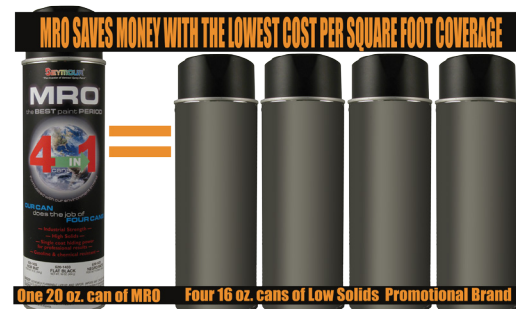

MRO enamel affords excellent protection in the following exposures:

Weather Resistance: Excellent gloss and color retention under normal weather conditions.

Water & Humidity: Withstands high humidity, splash and spray. This enamel is not recommended for continuous immersion.

Abrasion Resistance: Very good

Heat Resistance: Up to 250°F (121°C) dry heat
